## LMS Products:

PakTaleem offers three LMS products to suit needs of different clients. A brief description of each of the product is provided below:

### Teacher / Vocational Version:

This LMS version is suitable for a group of teachers or an institute that offers courses online. In this version, you can setup courses and users. Then, you can allow access to specific users for selected courses. This is feature rich LMS product which has everything an institute needs to deliver courses online. Further details in the comparison chart below.

### School / University / Corporate Version:

This LMS version has all the features of above LMS and also has additional features . This version is best suited for schools, colleges, universities, industry and corporates. With this version:

- You can better organize user into departments or classes heirarchy.
- You can assign managers, training managers, and trainers at different levels of organization
- You can design learning paths, and study programs.
- You can autoassign certain study programs or courses to a department / class.
- You can also generate reports at different levels of your organization.

### Reseller Version:

This LMS version has all the LMS features and additional tools to help you resell your courses to other organizations. In this version, you can setup your your courses as well as clients. The clients can then be allowed access to your selected courses. You can also setup client managers who can add their users to the LMS.

This version also allows you to setup a course shop where you can sell your courses to individual as well as company clients. This version is best suited for the companies who want to sell their training courses to multiple clients.

## Installation Modes:

PakTaleem offers LMS products to be availed either as hosted solutions or as on-premises installation. Details of each of them are detailed below:

### On-premises Installation:

In this approach, client buys and pays for hosting service and is responsible to maintain hosting account. Client provides hosting access to PakTaleem and PakTaleem sets up chosen LMS product on client server for a setup fee. PakTaleem also provides 10 hours of online training to use the software. Additional training sessions can also be asked at additional fees. On Premises installation of LMS costs just \$800 for LMS and \$500 for web conferencing. Both will requires separate servers.

### Hosted Service:

In this approach, we offer LMS solution which runs from our servers. We are responsible for:

- Keeping the system in healthy condition
- Installing security updates from time to time
- Setting up SSL certificates (Client pays for certificates but we offer free certificates from Let's encrypt)
- Maintain system backups
- Maintain codebase and staging site for proper development
- Providing ticketing support system
- Providing administrative support
- Providing level-III support
- Providing complete system backup for system migration (Optional)

Below are offered packages for Hosted service:

### Administration + Support:

Administration includes configuring site, courses development & configuration, user management & enrollment, support ticketing over ticketing system and phone calls, security patches. Administration & support is available as an addon service with all the packages at the following fees:

Package Type	Hourly Package	Monthly Package		
		10 hours	20 hours	40 hours
Fee	\$15 / hour	<a href="#">10h@\$12.50</a> = \$125	<a href="#">20h@\$10.00</a> = \$200	<a href="#">40h@\$8.00</a> = \$320

**Note:** Hours consumed beyond a package will be charged @\$15 / hour.

**Custom Development:**

PakTaleem also offers custom feature development and any integration of LMS with other systems. You may simply reach us through support system to get a free quote on any custom development. You can also get your custom development done from anywhere and provide us code with instructions from developer to get that deployed. This will involve cost for time required to deploy & validate the code.

**Additional Plugins:**

PakTaleem offers many additional LMS features in the form of paid plugins which you can buy to get that feature added to your LMS. For details, please visit 'Plugins' page on PakTaleem.com.
